

Priya Murkute

QA AUTOMATION ENGINEER • UNITED KINGDOM

priyamurkute7@gmail.com | LinkedIn | GitHub

QA Automation Engineer with **3+ years** of experience across **UI and API automation**, including modernising **legacy automation**, building **test frameworks from scratch**, and uncovering application and API-level defects through **exploratory testing**. **Recognised by Wipro** for technical learning agility, API automation contribution, product understanding and identifying requirement gaps.

EXPERIENCE

QA Automation Engineer (SDET) Feb 2023 — Sept 2024

Forever Voyage - freelancer - London

- Designed and executed **functional, regression and integration** tests for web applications, turning requirements into test cases and automation scenarios
- Automated UI regression with **Selenium WebDriver** using reusable page components, and tested REST APIs with **Postman** and **RestSharp**, covering payloads, status codes and negative scenarios
- Supported **root-cause analysis** with logs and API responses, and tracked defects in **Jira** through Agile sprints

Senior QA Automation Tester — Charles Schwab, Accounts LOB Oct 2021 — Oct 2022

Wipro Technologies - Pune, Maharashtra, India

Awards: Pleasure Working With You (Mar 2022) • Inspiring Performance Award (Jan 2022)

- **Led automation for the RGL page**, building UI and API frameworks **from scratch** with **WebdriverIO**, **TypeScript** and **Postman**, including **60+ Gherkin UI scenarios**
- **Migrated legacy Ruby UI automation** to **WebdriverIO + TypeScript**, automating **~80% of recurring regression scenarios** and cutting repetitive manual regression effort by **~40%**
- **Built API automation from scratch** for Accounts and RGL workflows: **30+ critical scenarios** covering positive, negative and business-rule cases, run as part of regression
- **Uncovered a critical Cost Method API vulnerability** using **Fiddler**: a manipulated request could set security cost values to **\$0** despite UI restrictions; worked with developers on remediation and regression validation
- Performed functional, regression, **exploratory**, UI and API testing across sorting, exports and account workflows, uncovering defects, **requirement gaps and edge cases** before release
- Delivered structured **knowledge-transfer sessions** for new joiners on workflows, frameworks and testing practices; worked in **Agile/Scrum** with developers, BAs and QA using **Jira**, **Git**, **Postman**, **Fiddler**, **WebdriverIO** and **TypeScript**

Project Engineer Oct 2019 — Oct 2021

Wipro Technologies - Pune/Pimpri-Chinchwad Area, India

- Designed test scenarios and detailed **test plans** and executed functional and regression suites for enterprise financial applications, applying **SDLC and STLC** best practices
- Learned UI automation with **Selenium** using **XPath/CSS optimisation** for stable locators, applied **OOP** concepts in automation modules, and supported **JSON-based REST API testing**
- Joined daily stand-ups and retrospectives, working with developers, clients and stakeholders to keep requirements aligned, and learned the application's workflows quickly from senior colleagues and documentation

SKILLS

Testing types	Functional, Regression, Integration, UAT, Exploratory, API
Automation	Selenium WebDriver, WebdriverIO, C#, Java, TypeScript, TestNG, Cucumber, Page Object pattern
API tooling	Postman, Newman, Rest Assured, Fiddler, REST APIs, JSON
Test & defect management	Jira, Test case management, Test reporting
Process	Agile (Scrum), SDLC, STLC, BDD / Gherkin modelling, Cross-functional Team Leadership, Sprint planning, Retrospectives
CI/CD & tooling	Jenkins, GitHub, Root cause analysis
Data & Analytics	SQL, Python, Excel, Power BI, Tableau, EDA, Data Quality, Predictive Analytics, Reporting

EDUCATION

2024	MSc Computer Science Queen Mary University of London
2019	BE Computer Engineering R. H. Sapat College of Engineering, Nashik
2016	Diploma, Computer Engineering Met's Bhujbal Knowledge City, Nashik

CERTIFICATIONS

- Programming Foundations: Software Testing/QA
- Test Automation Foundations
- Postman Essential Training
- Tata — GenAI Powered Data Analytics Job Simulation
- Deloitte Australia — Data Analytics Job Simulation
- Skyscanner — Front-End Software Engineering Job Simulation
- Y Combinator — Working as a Software Engineer at a Start-Up Job Simulation
