

Priya Murkute

QA Automation Engineer · United Kingdom

priyamurkute7@gmail.com · linkedin.com/in/priya-murkute-oct7 · github.com/Priya-Murkute

Three years automating test coverage for banking platforms at Wipro, then an MSc in Computer Science at Queen Mary while working part-time as a London-based SDET. I build frameworks that behave like real software — version-controlled, CI-integrated, and built to be inherited by whoever's on call after me.

SELECTED OUTCOMES

95%

defect catch rate
REST Assured and Postman folded into CI with Newman, at Wipro

-50%

regression cycle time
Selenium and WebdriverIO automation that made weekly releases possible

300+

Gherkin scenarios authored
Led BDD adoption with Cucumber to align testing with product requirements

EXPERIENCE

QA Automation Engineer (Part-time)

Feb 2023 – Sept 2023

- Testing Info · London
- Created and executed test cases and scenarios for web applications
 - Ran functional, regression and integration testing
 - Tested REST APIs with Postman and RestSharp
 - Logged and tracked defects in Jira
 - Worked with developers and product through Agile sprints
 - Produced test reports and supported release validation

Senior Project Engineer INSPIRING PERFORMANCE AWARD

Oct 2021 – Sept 2022

- Wipro Technologies · Pune, Maharashtra, India
- Led web and API automation initiatives (Selenium/Java, WebdriverIO, Postman) across a cross-functional Agile team on complex banking platforms
 - Built API frameworks and integrated them into CI pipelines with Newman, contributing to a 95% defect catch rate in staging
 - Ran RCA with developers to unblock bottlenecks and drive efficient defect resolution
 - Documented end-to-end test artefacts — test plans, strategies, execution reports, automation logs
 - Adopted BDD with Cucumber to improve requirement clarity within a CI/CD workflow
 - Mentored junior testers, helping raise team capability

Project Engineer

Oct 2019 – Oct 2021

- Wipro Technologies · Pune Area, India
- Designed test scenarios and detailed test plans; executed functional and regression suites
 - Applied SDLC and STLC best practices across delivery cycles
 - Automated UI regression with Selenium, using XPath/CSS optimisation for stable locators
 - Supported API automation with JSON-based REST API testing
 - Worked directly with clients and stakeholders to keep testing cycles and requirements aligned
 - Applied OOP concepts within automation modules to improve system efficiency

SKILLS

TESTING TYPES	Functional, Regression, Integration, UAT, Exploratory, API
AUTOMATION	Selenium WebDriver, WebdriverIO, C#, Java, NUnit, TestNG, Cucumber, Page Object pattern
API TOOLING	Postman, Newman, Rest Assured, RestSharp, REST APIs, JSON
TEST & DEFECT MANAGEMENT	Jira, Azure DevOps, Test case management, Test reporting
PROCESS	Agile (Scrum), SDLC, STLC, BDD / Gherkin modelling, Cross-functional Team Leadership, Sprint planning, Retrospectives
CI/CD & DATA	Jenkins, Azure Pipelines, GitHub, SQL, Root cause analysis

EDUCATION

2024	MSc Computer Science Queen Mary University of London
2019	BE Computer Engineering R. H. Sapat College of Engineering, Nashik
2016	Diploma, Computer Engineering Met's Bhujbal Knowledge City, Nashik

CERTIFICATIONS

- Programming Foundations: Software Testing/QA
- Test Automation Foundations
- Postman Essential Training

VOLUNTEERING

Student Volunteer Jul 2017 – Sept 2017
Quick Heal Foundation · Nashik

Educated students on cybersecurity — phishing risks, email threats, authentication best practices, online banking safety and data protection.
